TTC to Host Webinar for International Biochar Initiative:

Sewage Sludge & Biochar

As the management company of the International Biochar Initiative (IBI, www.biochar-international.org), Technology Transition Corporation is hosting the organization's Educational Webinar Series. This series features monthly topical webinars from noted biochar experts in academic and industry as speakers, followed by an interactive question and answer discussion with the webinar participants.

This month's webinar topic is Sewage Sludge & Biochar, and features Dr. Saran Sohi, head of the UK Biochar Research Centre, University of Edinburgh and Jeff Hallowell, with over 30 years experience in computer technology and pollution reduction/improving energy efficiency. The webinar will be moderated by Kathleen Draper, IBI Board Member, and U.S. Director of the Ithaca Institute for Carbon Intelligence.

The webinar is scheduled for **Wednesday, April 26th from 1:00-2:30 pm ET**. IBI Members are granted complimentary access to the webinars as a benefit of their membership. Non-members may register for a \$40 fee. For more information about the webinar and to register, visit: <http://www.biochar-international.org/node/8851>
